Description

Honored by Apple as one of the Best Apps of 2012. Webby Awards winner. SXSW Interactive Awards finalist.

** The download includes access to Volume One, a 20-part serialization covering the first decade of the phenomenon. **

The Silent History is a groundbreaking innovation in digital fiction, the story of a generation of unusual children, told through serialization, collaboration, and exploration.

"Entirely revolutionary." —Wired

"A landmark project that illuminates a possible future for e-book novels." —LA Times

In the early years of the 21st century, doctors begin to notice more and more children being born with a strange condition: silence. No speech, no comprehension, and soon a complete lack of engagement with most human interaction. The kids are seen as not much more than empty vessels, and many are sent to orphanages and group homes — until a teacher at one of these facilities realizes that the children have developed enigmatic, powerful skills of their own.

Testimonials are presented in the form of oral histories told by characters directly affected by the condition — parents, teachers, doctors, cult leaders, faith healers, and government officials, with unexpected intersections and unifying narratives. The 120 Testimonials provide the central backbone of the story.

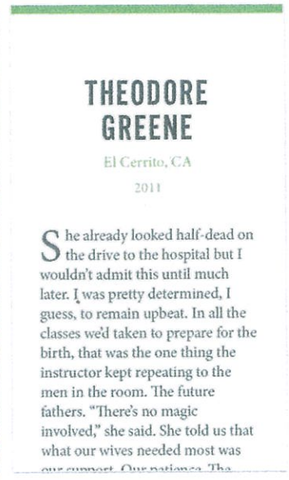

The Field Reports are short, site-specific accounts that deepen and expand the central narrative, written and edited in collaboration with the readers of the Testimonials. To access and comprehend a Field Report, the reader must be physically present in the location where the Report is set. Reports are deeply entwined with the particularities of their specific physical environments — the stains on the sidewalk, the view between the branches, a strangely ornate bannister, etc — so that the text and the actual setting support and enhance each other. Each of these reports can be read on its own, but they all interrelate and cohere within the larger narrative.

Customer Reviews

Love the concept and story but... ★★★★
by Clotaire

I love the concept of this different way of storytelling and am enjoying the characters and storyline as the plot slowly moves forward through the years. However, while I appreciate the IDEA of the location-based field reports, I absolutely hate that there are no such reports anywhere near my area (the South in the US) and that I will never be able to travel to any places where they do exist… I would be willing to pay an additional fee to gain access to the field reports.

Just Wow ★★★★★
by MommyCrazyLady

This was one of those finds I didn't expect to really draw me in and now I'm hooked. It's like this new reality but still a believable progression without pushing too hard or not enough. I have found myself looking for and imagining how I would deal in these silent groups and it's a completely remarkable experience. A very highly recommended piece and probably a favorite for a long time to come.
