E-mail: enquiry@edublitz.com

Date: 6 Mar 2019

For: **Anglo-Chinese School (International)**

Attn: **Ms Cheryl Seah**

Subject: **Proposal on STEM Workshop**

Dear Sir / Mdm

I refer to your invitation to propose **STEM Workshop** for your school. We are pleased to highlight the detail and pricing of our programme as per follow:

Detail of Proposal

(a) Detail of Programme & Suggested Lesson Plan
- Coding using Micro:bit

(b) Detail of Programme & Suggested Lesson Plan
- Product Design with 3D Modelling

(c) Cost for Supplying

(d) Our Track Records & Our Programme Feedbacks

(e) Particular of Contractor

Our offer will be valid for **60 days**. We look forward to your favorable reply. If you have any further queries, please feel free to contact me at HP: **9853 2870.**

Yours sincerely,

Dennis Soon
Assistant Sales Director
Edublitz Pte Ltd

Detail of Programme

Synopsis of Programme	**Edublitz Digital Media Series – Coding using Micro:bit** The programme aim to introduce simple circuit creation and generals interest in developing applications using user-friendly coding apps/software Our coding programme also develops learning experiences that allows your student to create the game of their dreams without writing a line of code. It's also the best way to introduce programming concepts, coding, software design, and digital media creation to your student. Enhance Critical and Inventive Thinking Gives student the environment and mindset to solve complicated problem and enable creativity and problem solving skills when building original games Learn basic programming concepts Use drag and drop interface and requires no programming to build sophisticated games in almost any genre Create program/game using user-friendly design interface Requires no coding knowledge and offers an easy entry point for Pupils to participate in game design in a fun way
Objectives	Beside fulfilling the objectives stated in your ITQ, our programme also provide the following objectives: • Increase Pupils' exposure to coding and computational thinking • Gain an insight into the elements of computer coding • Understand and apply the basic rules of creating a game and develop at least one simple game on their own • Understand the concepts of Programming and basic coding terminology. • Organize thoughts and ideas to complete tasks. • Provide opportunities for pupils to practice 21st century skills like critical thinking, being self-directed in learning and reinforcing skills acquired

Address: 31 Woodlands Close, #04-07
Woodlands Horizon
Singapore 737855
Office: (65) 6294 0305
Fax: (65) 6226 6366
E-mail: enquiry@edublitz.com

Following equipment/tool is suggested and will be loan and provided during training:-

Hardware

- Micro:bit (Basic set)
- Other Accessories
  - Alligator Test Leads
  - Active Buzze
  - Super Bright LED

Coding Tool - MadeCode

- JavaScript Blocks Editor – Online (Basic)
- JavaScript Editor (Intermediatee)

Micro:bit Set and Accessories

- Basic Micro:bit set with battery set and usb cable
- Crocodile clip & Buzzer

Other materials can be provided if required (subject to discussion)

E-mail: enquiry@edublitz.com

Suggested Lesson Plan: Micro:bit

Note:

- *Following suggested lesson plan design is based 9 lessons of 1 hour each with block codes*
- *Lesson content can scale up/down accordingly depending on the project and deliverables requirement as well as skill level of student*
- *The following lesson plan is designed for student whom do not have any knowledge of coding skill*
- *Lesson plan can be customized accordingly to school requirements after discussion with teacher in charge*

Lesson	Description
1	**Introduction to Coding and Micro:bit (Hardware)** • Introduction to Coding or Programming • Learn about Micro:bit • Learn about the basic feature and functions available in the tool • Understand the purpose and function of each components • Explain to Students the various features of the device (e.g. LED, Buttons) • Learn to connect the micro:bit to the computer
2	**Introduction to Algorithmic Thinking and Micro:bit (Software)** • Introduction to Students on concept of block based coding and algorithmic thinking skills • To learn about how to do coding with the features of showing text and displaying light on micro: bit • Working with Inputs: Buttons and Shake Sensors • Clear the LED screen • Learn to export hex file into Micro;bit (hardware) Activity 1: • Programming Faces on the LED display, clear screen via button inputs Activity 2: • Programming a Billboard with scrolling scripts. Challenge 1(If time Permits) • Dancing Robot: With what was previously though students are to create an animation of a dancing robot using LEDs & Loops.

Address: 31 Woodlands Close, #04-07
Woodlands Horizon
Singapore 737855
Office: (65) 6294 0305
Fax: (65) 6226 6366
E-mail: enquiry@edublitz.com

3	**Introduction to Variables & Random Events** • Students will have a more in-depth lesson on displaying on the LED display • To learn to use the buttons as inputs for instructions, simple animation and triggering events • Demonstrate understanding and apply skill by collaborating with classmates to create a game that uses a micro:bit and a program that correctly and effectively uses conditionals. Activity 1: • Heads or Tails: Students will create a coin flipping device with animation to generate one out of two outcomes. This will teach students the concepts of random values of two possible outcomes. • Random values is commonly used when designing games Activity 2: • Designing a Scoreboard with Micro:bit: Students will design a score board that can add, subtract and reset to zero. This lesson will create a score record commonly used in games Challenges(If time permits): • Students will programme a six sided dice • Students will design a step tracker which is basically a scoreboard with a on shake block.
4 - 5	**Using Micro:bit with other materials** Pupils will learn how to combine other materials such as cardboards and aluminum foil to further enhance the capabilities of micro:bit. Example of Activity: Fastest Reaction: Quick Reaction Game • Pupils will design and create a fast reflex device using their body's natural electric current

Address: 31 Woodlands Close, #04-07
Woodlands Horizon
Singapore 737855
Office: (65) 6294 0305
Fax: (65) 6226 6366
E-mail: enquiry@edublitz.com

	• The device will measure a student's reaction time in completing a circuit path on a cardboard pad. The pupil's reaction time is measured in both a distracted and an undistracted environment **Objectives:** • The objective of this session is to introduce pupils to elements and fundamentals of interact using different materials for their coding project
6	**Start and Planning of Final Project Work:** **Theme: To confirm with school OR company suggested theme** *(e.g. Community Safety or Health Awareness or Environmental Conservation - Students to programme the Micro:bit to create prototypes that can help conserve the environment)* • Students will be grouped into groups of 3 - 4 members • Students will brainstorm collaboratively to design a blue print and work plan to create for their project work • Students will create different types of prototype (e.g. energy saving alarm) based on what they have learnt previously
7 - 8	**Continue on Project Work** • Students will learn how to use combine other materials such as cardboards and aluminum foil to further enhance the capabilities of micro:bit. • Students will start to design, code and create their project work
9	**Completion of Project Work and Evaluation** • Completion of Project Work with enhancements • Showcase of games created by Students (if require) • Summary and Conclusion • Student to complete survey of programme

Address: 31 Woodlands Close, #04-07
Woodlands Horizon
Singapore 737855
Office: (65) 6294 0305
Fax: (65) 6226 6366
E-mail: enquiry@edublitz.com

Detail of Programme

Synopsis of Programme	**Edublitz Digital Media Series – Product Design with 3D Modelling** The programme aim to introduce concepts of product design through 3D modelling Product Design programme also develops learning experiences that allows your student to create 3D representation of a product or prototype. It's also the best way to introduce design concepts and 3D modelling to your students Enhance Critical and Inventive Thinking Gives student the environment and mindset to solve complicated problem and enable creativity and problem solving skills when building original games Learn basic 3D Modelling Use extrusion and scaling tools to manipulate and sculpt a product prototype
Objectives	Beside fulfilling the objectives stated in your ITQ, our programme also provide the following objectives: • Increase Pupils' exposure to product design & 3D modelling • Gain an insight into the elements of product design • Explain the product design process. • Critically debate the merits and challenges of each step of this process. • Apply the theories of product design in practical ways. • Provide opportunities for pupils to practice 21st century skills like critical thinking, being self-directed in learning and reinforcing skills acquired

Address: 31 Woodlands Close, #04-07
Woodlands Horizon
Singapore 737855
Office: (65) 6294 0305
Fax: (65) 6226 6366
E-mail: enquiry@edublitz.com

Following equipment/tool is suggested and provided during training:-

Software *(free 3D design software)*

- Sketch Up
- Tinkercad

Suggested Lesson Plan: Product Design with 3D Modelling

Note:

- *Following suggested lesson plan design is based 9 lessons of 1 hour each with block codes*
- *Lesson content can scale up/down accordingly depending on the project and deliverables requirement as well as skill level of student*
- *The following lesson plan is designed for student whom do not have any knowledge of 3D modelling*
- *Lesson plan can be customized accordingly to school requirements after discussion with teacher in charge*

Lesson	Description
1	**Introduction to Product Design** • Learn about the Product design basics • Defining a target audience • Creating a demand for their products • Conceptualization and Ideation ▪ Conceptualization of product ▪ Ideating the new product ▪ Innovating of an existing product
2	**Introduction to Basics of Design** • Elements and Principles of Art & Design • Sketching with A3 size papers and rulers • Presentation of concepts
3	**Introduction to Sketch Up - 3D modelling** • Introduction of basic and fundamental knowledge of 3D modelling • Understanding of product design and technical standards • Principles and elements of design and materials • Explore basic elements of design using lines, basic shapes, form, colour and texture

Address: 31 Woodlands Close, #04-07
Woodlands Horizon
Singapore 737855
Office: (65) 6294 0305
Fax: (65) 6226 6366
E-mail: enquiry@edublitz.com

4 - 5	**Sketch Up Software & Materials** • Introduction of Sketch up • Students will be introduced to the software and user interface • Using the material applications for buildings, products and other structures • Students will learn to model a simple toy and assign suitable materials • Understanding X,Y&Z planes • Scaled Dimensions • Modeling tools ▪ Extrude ▪ Bevel ▪ Offset
6 - 8	**Model a structure** • Based on the previous lessons students are to create a 3D model of a product • Students are to apply suitable materials • At the end of the sessions students will produce and aerial video tour of their 3D model of their product
9	**Evaluation and Conclusion** • Students to present their works (If time permits) • Reflection • Review and summary of programme • Student to complete online survey of programme

Package Plan Available for Training Programme

***Note:**

- Calculation based on 20 – 40 students per class with the instructor ratio is 1:20 students.
- Class size require min 20 pax to start
- All instructor/s will be MOE eRis registered.

Training Cost

Package	**Cost**	**Deliverables & Remarks**
Professional Package ***(Micro:bit / Product Design)*** **9 hours per student** *OR* **5 hours per student** *(school can choose all or either one of the duration or programme)*	**S$ 3,200 per package** **$160 per student** **S$ 2,600 per package** **$130 per student** *(Note: All price is subjected to 7% GST)*	Pre-training ▪ Meeting with school to confirm requirement ▪ Advise and test equipment / tablet with app ▪ Prepare and print training materials During training ▪ Conduct training programme for student ▪ Provide all necessary resources and materials required for programme ▪ Conduct attendance taking (if required) ▪ Issue training material to all students ▪ Conduct post-training survey at the end of programme ▪ Collection of all student works when programme completed Post-training ▪ Consolidate and compile survey result for school ▪ Provide 2 sets of DVD consist of all student softcopy work and evaluation report of programme • Post training meeting for feedbacks and suggestion and handover of deliverables

Price is subjected to prevailing GST

Feedbacks about our Programme

"The trainers encouraged us to think out of the box."

– Student from Zhonghua Primary School, 2018

"The programme was informative, interesting and engaging."

– Student from Greenwood Primary School, 2018

"We can learn new things from this workshop but even though it takes a long time to do our own project, in the end it will turn out well and become a really good movie."

– Student from Woodlands Primary School, 2018

"I learnt a lot of things and the instructor was clear."

– Student from Farrer Park Primary School, 2017

"The instructor teaches the pupils individually when the pupils don't know what to do."

– Student from Tampines North Primary School, 2017

"The way they teach .How fast we have learnt in SEVEN days!"

– Student from Tampines Primary School, 2017

"The instructors are extremely friendly. If there is anything wrong I will not hesitate to ask for help."

– Student from Hougang Primary School, 2017
