Candidate personal code:

Theory of knowledge presentation planning document

Title of presentation:

Indicate the **duration** of the presentation: 15 minutes

Indicate the **number of participants** in the presentation: 1

CANDIDATE SECTION

*Candidate responses on this document must be **typed** and limited to a **maximum of 500 words** for the whole of the **Candidate section** (not per field). It is not permitted to exceed the two sides of the candidate section.*

Describe your real-life situation:

My real-life situation is about the reasons why many

State your central knowledge question (this must be expressed as a question):

?

Explain the connection between your real-life situation and your knowledge question:

Knowledge is the form of information that people receive and believe. It can be received from many sources or could even be self-constructed. The main sources of information (about the benefits of learning English) that the Spaniards in the real-life situation receive is a form of shared and distributed knowledge as they have a common perception that English is vital for developing their life prospects. To answer the real-life situation, the Spaniards ’ knowledge of learning English are influenced by their intuition, geographical location and the national history when it comes to the learning of English.

Outline how you intend to develop your TOK presentation in the context of your real-life situation. Include analysis of your main knowledge question and related knowledge questions as well as arguments and perspectives. Responses can be presented in continuous prose or as a list of points:

Firstly, I will ask several subject specific knowledge questions in my first RLS. These are subject specific knowledge questions that will help create my main knowledge question of “ How does the knower ’ s profile impact one ’ s motivation to acquire knowledge? ”

My subsidiary knowledge questions are:

To answer my knowledge question, I w

Show the significance of your conclusions with particular reference to your real-life situation and indicate how those conclusions might be relevant to other real-life situations:

To conclude, knowledge is often two-sided and shared. This is because one ’ s own perception of knowledge can easily shape other people ’ s understanding of knowledge and thus, develop a common belief towards a particular situation. Additionally, knowledge is easily influenced by one ’ s geographical location, age and intuition.

Another RLS would be the overcrowding of Amsterdam due to mass tourism. While tourism has brought in revenue and a sense of common identity between tourists and locals, it has made some locals resentful towards tourism, which has sparked increased crime and crowded streets. In this RLS, people ’ s knowledge are linked to age and location, similar to the first RLS. However, instead of intuition, globalization has been crucial to shaping people ’ s knowledge as more knowledge has been brought about and shared to the locals, just like how the benefits of English has been shared with the Spaniards in the first RLS.
